STATE OF MISSISSIPPI
DEPARTMENT OF EDUCATION
Richard L. Thompson, Ed.D.
State Superintendent of Education

January 3, 1991

To the Legislature of the State of Mississippi:

In accordance with the requirements of Section 37-3-11 of the Mississippi Code of 1972, Annotated, I am pleased to submit to you the annual report of the State Superintendent of Education for fiscal year 1989-90.

I am pleased to report that the elementary and secondary education system of Mississippi made progress again in the 1989-90 school year:

(1) Student achievement, as measured by nationally standardized tests and our own Mississippi tests based on our Mississippi curriculum, increased for the fifth consecutive year.

(2) Long-distance learning via satellite was available in 162 Mississippi schools. Student courses not normally available, such as Japanese, German, Russian, Probability and Statistics, and other upper level science and mathematics courses, were broadcast. In late January 1991, students in four school districts will inaugurate Mississippi's first interactive television instruction. Using fiber-optic cable, this system will expand distance learning opportunities and permit all participating teachers and students to see and to talk to each other during the class. In addition to distance learning, Mississippi students have greater access to computerized learning technology applications specifically in writing and remedial instruction.

(3) The system of accountability authorized in the Education Reform Act of 1982 continues to serve us well; however, the system developed by the State Department of Education is being reviewed for needed improvements. At this time, additional levels of accreditation are being considered for school districts which have achievement higher than the current requirements.

(a) School district profiles, which in effect are "report cards" for local school systems, were refined and issued for the third time.

(b) Twelve school districts were placed on probation because their students' performance on achievement tests were lower than the expected minimum level.

(c) Eleven school districts were placed on probation because they ended the fiscal year in a budget deficit situation.

I appreciate the continuing support of the Legislature. Without you, many of our accomplishments would not have been possible.

Very truly yours,

Richard L. Thompson

SCHOOL ACCREDITATION
1989-90

The Education Reform Act of 1982 created a performance-based accreditation system and made state accreditation a mandatory process for all public school districts. The performance-based system emphasizes outcome measures rather than quantitative factors and is designed to accredit school districts rather than individual schools. During school year 1988-89 the Commission on School Accreditation awarded an accredited status to each of the one hundred fifty six public school districts. In 1989-90, twelve school districts were placed on probation for substandard performance on outcome measures. Thirty-four districts were warned for less than adequate performance on these measures. The state accreditation system remained voluntary for nonpublic and special schools in the state. The majority of the nonpublic schools are parochial, and the special schools are those established to serve special needs of students. During the 1989-90 school year, the Commission on School Accreditation received applications from and subsequently accredited **56 nonpublic schools and 18 special schools.**

PUBLIC SCHOOL BUILDING FUND
1989-90

The Public School Building Fund was created to provide state funds for the capital improvement of schools in the State. Such capital improvements include the cost of erecting, repairing, equipping, remodeling and enlarging school buildings and related facilities.

The financial structure of the state public school building fund is made up of three interlocking, yet distinct features: (1) annual grants to school districts; (2) legislative funding of the program; and (3) state school bonds. With limited capital improvement funds, the State Board of Education approved building projects as follows during 1989-90:

	Number Approved	Estimated Cost	Public School Building Funds
Long Range Plans	25	$35,533,932.65	
Applications	39	6,776,177.57	$3,055,028.47
Supplementary Applications	2		341,949.46
Contracts	35	5,428,935.83	2,097,588.59
